(909) 288-9697 • dchen24@cmc.edu

EDUCATION

Claremont McKenna College

B.A., Mathematics & International Relations, Computer Science minor

Claremont, CA

Dec 2024

- GPA: 3.82/4
- Awards: Phi Beta Kappa, Intuit Case Competition (3rd place 2022; 1st place, 2023)
- Relevant Coursework: Big Data, Languages for Computing, Computer Systems, Data Mining, UX Design

EXPERIENCE

Samba TV

San Francisco, CA

Data Analyst

Feb 2025 – Present

- Revitalized legacy pipelines to establish a Single Source of Truth (SSOT) across 7 dashboards, and currently spearheading the infrastructure migration to Databricks to secure ~\$150k in annual contract savings
- Conducted 15+ "Leaky Bucket" analyses using Pandas to diagnose integrity gaps, bridging technical teams (TVP, Content ID) to resolve upstream quality issues and remediate a ~5% data discrepancy in core reporting metrics
- Engineered an automated OEM payment pipeline orchestrated via Airflow to accommodate complex partner requirements, saving 15+ hours of monthly manual labor and streamlining operations for Business Development

Measurement Product Intern

May 2024 – Aug 2024

- Spearheaded development of a natural-language-to-SQL chatbot applying Retrieval-Augmented Generation (RAG) to democratize data access, deploying a beta feature that enabled clients to perform complex queries

Heeyo (Startup funded by OpenAI)

Palo Alto, CA

Product Manager

Feb 2024 – May 2024

- Defined go-to-market and monetization strategy by analyzing mobile gaming trends, introducing a hybrid model with subscription and in-app purchases, led to lower barrier to entry and **doubled** user acquisition
- Led product iteration by establishing a continuous feedback loop of user interviews and A/B testing, resulting in 3 major gameplay updates that refined the core game loop and drove a **30%** increase in user retention

Hike Capital

Beijing, China

Investment Intern

Jun 2022 – Sep 2022

- Conducted due diligence on 60+ startups across frontier tech sectors (including commercial aerospace and blockchain), assessing product-market fit by building models and synthesizing insights from expert interviews
- Authored 5 investment memos on high-potential startups, presenting data-driven recommendations grounded in user growth modeling, and competitive landscape mapping to directly inform partner investment decisions

PROJECT

Veritas China

Shanghai, China/Remote

Co-founder & Head of Product

Sep 2019 – Present

- Established and scaled a competitive liberal arts summer program, leading a team of 60+ instructors and staff to serve 100+ students annually with <20% acceptance rate and 98% post-program satisfaction score
- Architected a multi-channel digital strategy across platforms, growing online community to 30,000+ members by launching podcast scaled to 8,000 subscribers and building student ambassador program to drive growth
